...

The impedance tube system, based on the ASTM E2611-09 standard (ASTM E2611, 2009) for measuring the normal incidence transmission loss (TL) is schematically illustrated in Fig 1a. The TL results is calculated with two microphones positioned at the upstream and two more microphones positioned downstream of the test sample as shown in Fig. 1b.

EZ2611 is an automated testing application designed to efficiently perform sound transmission tests on materials in an impedance (Kundt) tube to the ASTM E2611-09* standard. Contact us for more details or to schedule an online demonstration.

EZ2611 Normal Incidence Sound Transmission Application ...

The ASTM E2611-09 standard test procedure for measuring an STL utilises a transfer matrix method for the calculation. The data for the calculations are obtained from the sound pressure measurements from four microphones, two positioned between the sound source and the specimen and two positioned on the opposing
