We introduce 14 evidence-based language interventions for children, and we provide speci? c infor-

Treatment of Language Disorders in Children

Speech and language intervention can take the form of training parents to work with their own children to improve their speech. Such programs are effective in improving the child's language and also at changing the mother's speech patterns. Parents must be trained and monitored by a speech therapist for this strategy to be useful.

Speech Language Intervention Strategies | Synonym

Having a language or speech delay or disorder can qualify a child for early intervention (for children up to 3 years of age) and special education services (for children aged 3 years and older). Schools can do their own testing for language or speech disorders to see if a child needs intervention.

Language and Speech Disorders in Children | CDC

Receptive language disorder. A child has trouble understanding words that he or she hears and reads. Expressive language disorder. A child has trouble speaking with others and expressing thoughts and feelings. A child will often have both disorders at the same time. Such disorders are often diagnosed in children between the ages of 3 and 5.
