Pressure Ulcer and Skin Care. Pressure ulcers are a frequent, costly, and potentially life-threatening complication of spinal cord injury. Pressure ulcers can have a major impact on quality of life. Prevention, early detection, and treatment are key. General practitioners, therefore, play a critical role.

Pressure Ulcer and Skin Care :: Royal National Orthopaedic ...

Regularly inspecting patients' skin to identify skin abnormalities is a key practice in pressure ulcer prevention. Skin assessment is a core element of the SSKIN care bundle for reducing the numbers of pressure ulcers (Whitlock, 2013). This recognises that, even in the absence of a structured risk assessment, changes in skin signal increased risk and may predict the occurrence of deeper pressure damage.

Pressure ulcer education 3: skin assessment and care ...

The Department of Health (2018) pressure ulcer guidance identifies that a pressure ulcer is a localised injury to the skin and/or underlying tissue usually over a bony prominence. The 4 main factors implicated are interface pressure, shear, friction, and moisture.

NHS England » React to Red – Reducing pressure ulcers in ...

A pressure ulcer occurs when the skin and underlying tissue gets damaged by unrelieved pressure. Essentially the skin, its blood supply and underlying tissue are squashed between the hard surface (the cause of pressure) and the underlying bone.

Maintaining Skin Integrity and Preventing Pressure Ulcers

To learn about a five-step care bundle that can assist in preventing pressure ulcers Pressure ulcers develop when the skin and underlying tissues are subjected to pressure, friction and/or shear, and, in many cases, moisture. These factors lead to impaired blood supply and injury to the skin and underlying tissues.

Using the SSKIN care bundle to prevent pressure ulcers in ...
